PROTECTING THE WATER, WILDLIFE AND OUTDOOR HERITAGE OF THE CROWN OF THE CONTINENT.

A Scientific Approach to understanding the importance of a contiguous ecosystem

Grouse Mountain Lodge, Whitefish, Montana
\$10, at door | seating limited, come early | cash bar
Monday, March 12 | 7-9pm

Presentations by
these leading
conservation scientists:

Dr. Michael Proctor
Principle Investigator for
the Trans-Border Grizzly
Bear Project

Dr. Richard Hauer
Director of the Montana
Institute on Ecosystems, The
University of Montana

Dr. John Weaver
Senior Conservation
Scientist for the Wildlife
Conservation Society

Leading Scientists to Talk about Griz, Critters with Teeth, and Wet-and-Wild River Things

~ Please Join Us for an Informative Evening ~

When: Monday, March 12, 2012, 7-9pm

Where: Grouse Mountain Lodge, 2 Fairway Dr., Whitefish

Cost: \$10 suggested donation

Cash Bar / Seating Limited ~ come early!

February 16, 2012

Dear [member_name_first]:

[Headwaters Montana](#) is co-sponsoring an important science forum on the ecological value of Waterton - Glacier International Peace Park and the importance of completing Waterton Park by expanding the park into British Columbia.

Three leading researchers will make presentation on transboundary grizzly bear populations, aquatics, fisheries, ungulates and predator wildlife species.

The three researchers will focus on recent scientific discoveries and insights made in the vicinity of Waterton-Glacier International Peace Park.

- **Dr. Richard Hauer** is director of the recently formed [Montana Institute on Ecosystems](#) of the University of Montana, will speak about the biological richness of the transboundary Flathead River (aka the North Fork Flathead River), and make the case that the Flathead River system is one of the most ecologically intact rivers in the Lower 48.
- **Dr. Michael Proctor** is the Principal Investigator for the [Trans-Border Grizzly Bear Project](#) based in British Columbia. Dr. Proctor recently published a ground-breaking study published in the Wildlife Monographs that documents the challenges facing grizzly bears in the transboundary region of the Rocky Mountains between Montana and British Columbia.
- **Dr. John Weaver** is Senior Conservation Scientist for the [Wildlife Conservation Society](#). Dr. Weaver has published several monographs on the abundance and distribution of ungulates and carnivores in the transboundary Flathead Region. He recently released a third monograph titled, "[Conservation Value of Roadless Areas for Vulnerable Fish and Wildlife Species in the Crown of the Continent Ecosystem](#)."

[Headwaters Montana](#) is co-sponsoring the event with [Wildsight](#), [National Parks Conservation Association](#), [Canadian Parks and Wilderness Society](#), [Yellowstone to Yukon Conservation Initiative](#), and [Sierra Club BC](#).

~ See you Monday, March 12, at 7:00pm at Grouse Mountain Lodge, Whitefish ~

~ Please support this conference with your donation... Thank you ~
